

Personal data protection (PDP) Regulation Legal Services

2024

KPMG Law Vietnam: Our Personal Data Protection Services

“The protection of personal data is crucial for the well-being and rights of individuals in our increasingly digital world.”

In today's digital age, data is of paramount importance to any business, and it has become an integral part of any business strategy. (Personal) data protection is not just a legal consideration and obligation; it is embedded in market and customers' expectations. Customers now expect businesses to handle their personal information responsibly, and failure to do so can have serious consequences. With the rise of data breaches and unauthorized access, businesses must prioritize data protection to safeguard their customers' trust.

In recent years, governments around the world have been increasingly active in regulating personal data protection. They have either adopted new regulations or modernized existing ones to address the evolving needs of the digital age. Consistent with this global trend, the Government of Vietnam issued Decree 13/2023/ND-CP on Personal Data Protection (Decree 13). These regulations aim to ensure that businesses handle personal data securely and in accordance with the law.

As a leading provider of legal services in Vietnam, our team has a deep and thorough understanding of the Vietnamese legal environment, as well as international best practices. We have a team of experienced lawyers who can provide tailored advice specific to your business's data protection needs.
